#### CITY OF LONG BEACH CITY COUNCIL SUPPLEMENTAL AGENDA

Robert Garcia, 1st District Suja Lowenthal, 2nd District Gary DeLong, 3rd District Patrick O'Donnell, 4th District

Patrick H. West, City Manager Larry G. Herrera, City Clerk

TUESDAY, MAY 5, 2009 COUNCIL CHAMBER, 5:00 PM

Gerrie Schipske, 5th District Dee Andrews, 6th District Tonia Reyes Uranga, 7th District Rae Gabelich, 8th District Val Lerch, Vice Mayor, 9th District

Robert E. Shannon, City Attorney

# FOR THE MEETING OF MAY 5, 2009

The Supplemental Agenda contains corrections and additions, which were posted more than 72 hours in advance of the above meeting date.

#### SUPPLEMENTAL AGENDA (ADDITIONS)

32. 09-0484

Recommendation to request City Attorney to draft a resolution in support of SB 696 (Wright) - Emission Reduction Credits and direct City Manager to communicate the City's support to Long Beach legislative offices.

Office or Department: COUNCILMEMBER TONIA REYES URANGA,

SEVENTH DISTRICT; COUNCILMEMBER SUJA

LOWENTHAL, SECOND DISTRICT;

COUNCILMEMBER GARY DELONG, THIRD

DISTRICT

Suggested Action: Approve recommendation.

33. 09-0228

Recommendation to adopt resolution proclaiming a local emergency under California Government Code Section 8630 and authorizing City Manager to execute any necessary agreements with the State of California for Swine Influenza A (swH1N1) control, and ratifying the declaration of a local health emergency issued by the City Health Officer under California Health and Safety Code Section 101080. (Citywide)

Office or Department: HEALTH AND HUMAN SERVICES

Suggested Action: Approve recommendation.

The Office of Tonia Reyes Uranga Council Member, Seventh District Memorandum

NB-32

Date:

May 5, 2009

To:

Honorable Mayor and Members of the City Council

From:

Council Member Suja Lowenthal, Second District

Council Member Gary DeLong, Third District (

Council Member Tonia Reyes Uranga, Seventh District

Subject:

Support for SB 696 (Wright) - Emission Reduction Credits

Thousands of businesses and essential public services have been forced to delay or cancel projects to install modern, cleaner equipment that reduces harmful emission and reduce green house gas emissions due to a recent state court ruling that forced the South Coast Air Quality Management District (SCAQMD) to stop issuing permits relying on the District's internal offset accounts. Affected businesses include essential public services, such as sewage treatment plants, hospital, schools, fire and police stations, and landfill gas to energy projects, gas stations, dry cleaners, auto body shops, printers and food manufactures. As a result, almost 1,000 permits are on hold, with potentially over 3,000 existing permits relying on the District's internal offsets accounts representing over 2,000 facilities in further ieopardy, which will have to be revoked. In Long Beach, approximately 136 permits submitted 1996-1998 would be revoked with 25 current permits application on hold.

In response, Senator Rod Wright introduced SB 696 to re-establish SCAQMD's internal offset account and allow access to its priority reserve. The legislation provides a limited California Environmental Quality Act (CEQA) exemption to certain SCAQMD rules which will allow the issuance of required SCAQMD permits for the construction of fire stations, police stations, hospital power generators, electricity generators and other projects that are essential public services. Without this legislation, the lack of SCAQMD permits means lost jobs and delays in building needed projects, particularly for projects that would be eligible for receiving 'Stimulus Funding' from the federal government.

Recommended Action: Request the City Attorney to draft a resolution in support of SB 696 (Wright) - Emission Reduction Credits and direct the City Manager to communicate the City's support to Long Beach legislative offices.

### SB 696 (WRIGHT) EMISSION REDUCTION CREDITS

#### The Problem

- Due to a recent state court CEQA decision SCAQMD has been forced to stop issuing permits relying on the District's internal offsets accounts.
- As a result, almost 1,100 permits are on hold, with potentially over 3,000 existing permits representing over 2,000 facilities in further jeopardy, which will have to be revoked
- Affected businesses include essential public services, such as sewage treatment plants, hospitals, schools, fire and police stations, and landfill gas to energy projects, gas stations, dry cleaners, auto body shops, printers, and food manufacturers.
- Without the use of AQMD's internal offset account government and businesses could be forced to spend up to \$4 billion for buying pollution credits if they are available at all. Credits on the open market are unaffordable, with estimated costs of \$234,000 for a gas station, \$1.6 million for a tortilla fryer and oven, and \$115 million for a landfill gas to energy project.
- Lack of SCAQMD permits means lost jobs and delays in building needed projects, particularly for
  projects that would be eligible for receiving 'Stimulus Funding' from the federal government and
  cannot be built without SCAQMD permits.
- Many of these projects that can't get permits involve installation of modern, cleaner equipment that reduces harmful emissions resulting in a slower clean up of the environment and even setting back efforts to reduce greenhouse gas emissions.

#### The Solution

- SB 696 will re-establish SCAQMD's internal offset account and allow access to its priority reserve.
   It provides a limited CEQA exemption to certain SCAQMD rules which will allow the issuance of required SCAQMD permits for the construction of fire stations, police stations, hospital power generators, electricity generators and other projects that are essential public services.
- Individual permits would **not** be exempted from CEQA. The California Energy Commission (CEC) would undertake a CEQA analysis on proposed power plants. SCAQMD or the city or county acting as lead agency would continue to conduct CEQA analysis on permits, as required under existing law.
- In order to obtain offsets from SCAQMD, power plants must:
  - o have a contract with the applicable utility, and the CEC must conduct a 'needs analysis' and find that the plant is necessary and must be located within the District,
  - o pay mitigation fees, at a minimum cost of \$92,000 per ton of PM10, which will be used to reduce pollution in the areas impacted by the power plant, and
  - o meet stringent technology limits, with stricter requirements in areas of higher pollution, and meet other SCAQMD rule requirements which are the most stringent in the nation.

#### Introduced by Senator Wright

February 27, 2009

An act relating to emission reduction credits. An act to add Sections 40440.12 and 40440.13 to the Health and Safety Code, relating to air quality, and declaring the urgency thereof, to take effect immediately.

#### LEGISLATIVE COUNSEL'S DIGEST

SB 696, as amended, Wright. Air quality: regional districts: CEQA exemptions: emission reduction credits.

(1) The California Environmental Quality Act (CEQA) requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report (EIR) on a project that it proposes to carry out or approve that may have a significant effect on the environment or to adopt a negative declaration if it finds that the project will not have that effect. CEQA also requires a lead agency to prepare a mitigated negative declaration for a project that may have a significant effect on the environment if revisions in the project would avoid or mitigate that effect and there is no substantial evidence that the project, as revised, would have a significant effect on the environment. CEQA exempts certain specified projects from its requirements.

Under existing law, every air pollution control district or air quality management district in a federal nonattainment area for any national ambient air quality standard is required to establish by regulation, a system by which all reductions in emissions of air contaminants that are to be used to offset certain future increases in the emission of air contaminants are banked prior to use. *Pursuant to this requirement the* 

South Coast Air Quality Management District (district) promulgated various rules establishing offset exemptions, providing Priority Reserve offset credits, and creating or tracking credits used for offset exemption or Priority Reserve projects. In Natural Resources Defense Council v. South Coast Air Quality Management District (Super. Ct. Los Angeles County, 2007, No. BS 110792), the superior court found the promulgation of certain of these district rules to be in violation of CEOA.

This bill would state that it is the intent of the Legislature to enact legislation to ensure that there are sufficient credits available for the South Coast Air Quality Management District to issue permits for essential public services and new clean efficient power plants exempt from the requirements of CEQA the adoption and implementation of specified district rules, and the creation or the use of specified credits pursuant to district rules by a thermal powerplant when certain conditions are satisfied. Because a lead agency would be required to determine whether the use of the credits qualifies for an exemption, this bill would impose a state-mandated local program.

(2) Existing law requires the State Energy Resources Conservation and Development Commission (Energy Commission) to adopt, on a biennial basis, an integrated energy policy report to include an assessment and a forecast of the need for resource additions, efficiency, and conservation that considers all aspects of energy industries and markets.

This bill would require the Energy Commission to perform a needs assessment for a thermal powerplant proposed to be located in the district.

- (3) This bill would state the findings and declarations of the Legislature concerning the need for special legislation.
- (4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Vote: majority <sup>2</sup>/<sub>3</sub>. Appropriation: no. Fiscal committee: no-yes. State-mandated local program: no-yes.

The people of the State of California do enact as follows:

1 2

SECTION 1. (a) The Legislature finds and declares all of the following:

- (1) Because of the superior court decision in Natural Resources Defense Council v. South Coast Air Quality Management District (Super. Ct. Los Angeles County, 2007, No. BS 110792) holding the South Coast Air Quality Management District (district) violated the requirements of the California Environmental Quality Act (CEQA) (Division 13 (commencing with Section 21000) of the Public Resources Code) in the promulgation of certain district rules, the district is unable to issue over a thousand pending permits that rely on the district's internal offset bank to offset emissions.
- (2) The superior court decision also required the district to set aside several thousand permits that were previously issued in reliance on the district's internal offset bank. These permits have been subject to analysis performed pursuant to CEQA that the lead agency has deemed appropriate.
- (3) If prompt legislative action is not taken to correct this situation, projects will be stopped from going forward or frozen in place, representing significant losses to the economy, as well as numerous well-paying jobs. The impact of approved projects not going forward will dramatically impede any economic recovery in southern California and contribute to another state deficit as a result of lower tax revenues.
- (4) Affected projects include equipment replacement to reduce air emissions, plus projects for essential public services such as hospitals, schools, landfills, sewage treatment plants, renewable energy projects, and small sources, including small businesses that are unable to locate or afford credits on the open market. With time, many other similar projects will have to be placed on hold, or have their application withdrawn.
- (5) The superior court decision also prohibits the district from issuing air credits from its Priority Reserve to thermal powerplants that are needed to meet the current and future projected electricity needs of the region and to prevent blackouts during peak demand periods.
- 37 (6) Without corrective legislation, the district cannot improve 38 air quality by allowing the existing older and higher emitting and

SB 696 —4—

less efficient powerplants to be replaced with new cleaner and more efficient powerplants. Fifty percent of available total power in the region is generated from powerplants that are 40 years or older.

- (7) Failure to correct this problem will mean the district cannot help meet the mandates set forth in the California Global Warming Solutions Act of 2006 (Division 25.5 (commencing with Section 38500) of the Health and Safety Code) if it cannot issue permits to provide necessary peaking power to support increased reliance on renewable energy as will be required by state efforts to reduce greenhouse gases.
- 12 (b) It is therefore necessary that legislation be enacted to allow 13 the district to resume issuing permits and to abrogate the superior 14 court decision in Natural Resources Defense Council v. South 15 Coast Air Quality Management District (Super. Ct. Los Angeles 16 County, 2007, No. BS 110792).
- 17 SEC. 2. Section 40440.12 is added to the Health and Safety 18 Code, to read:
  - 40440.12. The California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) does not apply to either of the following:
  - (a) (1) The adoption or implementation of rules by the south coast district establishing offset exemptions, providing Priority Reserve credits, or creating or tracking the credits used for offset exemptions or Priority Reserve projects, if the discretionary projects that use those exemptions or credits are subject to this division or are exempt from this division pursuant to a categorical or statutory exemption and all of the following are satisfied:
  - (A) South coast district rule requires the use of the best available control technology, as defined in Section 40405, and air quality modeling to ensure the source will not cause a violation, or make significantly worse an existing violation, of any ambient air quality standards as defined in district rule 1303, unless exempted from modeling pursuant to district rule 1304, as amended June 14, 1996, for each new, relocated, or modified source with an emissions increase of one pound per day or greater of any air contaminant.
  - (B) South coast district rule prohibits the construction of any new, relocated, or modified permitted unit if the emissions of any toxic air contaminant, as listed by the district board, exceed a

\_\_5\_\_ SB 696

cumulative increase in maximum individual cancer risk at any receptor location of greater than one in one million if the permitted unit is constructed without best available control technology for toxic air contaminants, or greater than 10 in one million if the permitted unit is constructed with best available control technology for toxic air contaminants or exceeds a chronic or acute noncancer health effect hazard index of 1.0.

- (C) The south coast district accounts for the use of offset credits pursuant to this subdivision as part of the district's state implementation plan submissions and demonstrates that the use of the offset credits will not interfere with attainment or maintenance of ambient air quality standards.
- (D) South coast district rules 1304, 1309.1, and 1315, as specified in this subdivision, have been submitted to the United States Environmental Protection Agency, and have not been disapproved by that agency.
- (2) The exemption provided in this subdivision applies to offset exemptions pursuant to south coast district rule 1304, as amended June 14, 1996, Priority Reserve credits pursuant to south coast district rule 1309.1, as amended May 3, 2002, and the adoption and implementation of south coast district rule 1315, as adopted September 6, 2006, and readopted August 3, 2007.
- (3) Upon the satisfaction of conditions specified in subdivision (1), the exemption provided in this paragraph applies to all action taken pursuant to the south coast district rules specified in paragraph (2) on and after September 6, 2006.
- (b) The adoption of south coast district rule 1309.1 and the creation or use of Priority Reserve credits pursuant to south coast district rule 1309.1, as amended August 3, 2007, by a thermal powerplant that is subject to this division or to Chapter 6 (commencing with Section 25500) of Division 15 of the Public Resources Code if all of the following requirements are satisfied:
- 33 (1) South coast district rules include the requirements and 34 prohibitions specified in subparagraphs (A) and (B) of paragraph 35 (1) of subdivision (a).
- 36 (2) The thermal powerplant emissions comply with the 37 requirements for best available control technology, air quality 38 modeling impacts, toxic impacts, and emissions levels as specified 39 in south coast district rule 1309.1, as amended August 3, 2007.

- (3) The thermal powerplant has entered into long-term contracts with Southern California Edison Company, San Diego Gas and Electric Company, or the State of California to provide electricity in southern California, or is a powerplant owned by a local publicly owned utility that is designed and constructed not to exceed that utility's native demand load projections, or the use of the credit is otherwise allowed by the south coast district board pursuant to south coast district rule 1309.1.
  - (4) The south coast district accounts for the thermal powerplants' use of Priority Reserve credits pursuant to this subdivision as part of its state implementation plan submissions and demonstrates that the use will not interfere with attainment or maintenance of ambient air quality standards.
  - (5) South coast district rule 1309.1, as amended August 3, 2007, and south coast district rule 1315, as adopted September 6, 2006, and readopted August 3, 2007, have been submitted to the United States Environmental Protection Agency and have not been disapproved by that agency.
  - (6) The State Energy Resources Conservation and Development Commission has conducted a needs assessment that has determined that the thermal powerplant is necessary to meet future energy needs in southern California or the south coast district, and has determined it is necessary for the thermal powerplant to be located in the south coast district.
  - (7) (A) The thermal powerplant pays a mitigation fee for the Priority Reserve offset credits obtained that shall be at a minimum the amount set forth in south coast district rule 1309.1, as amended August 3, 2007.
  - (B) The south coast district board may by amendment to that rule, after a public hearing, increase the fees without affecting the applicability of this paragraph.
  - (C) The south coast district shall, to the extent technically and economically feasible, use the mitigation fees to mitigate emissions of the relevant pollutants or its precursors in the area impacted by emissions from the thermal powerplant, with a minimum of one-third to be used for installation of renewable or alternative sources of energy. Up to 10 percent may be used by the district for administration of the mitigation program.
- 39 SEC. 3. Section 40440.13 is added to the Health and Safety 40 Code, to read:

SB 696 -7-

40440.13. (a) The State Energy Resources Conservation and 1 Development Commission shall perform a needs assessment considering the issue specified in paragraph (6) of subdivision (b) 3 of Section 40440.12 for a thermal powerplant proposed to be 4 located in the south coast district, whether or not the thermal 5 powerplant is subject to Chapter 6 (commencing with Section 6 25500) of Division 15 of the Public Resources Code. 7

(b) (1) For the purposes of this section, "thermal powerplant" means any stationary or floating electrical generating facility using any source of thermal energy and any facilities appurtenant to the facility. Exploratory, development, and production wells, resource transmission lines, and other related facilities used in connection with a geothermal exploratory project or a geothermal field development project are not appurtenant facilities for the purposes of this section.

(2) "Thermal powerplant" does not include any exclusively 16 wind, hydroelectric, or solar photovoltaic electrical generating 17

18 facility.

SEC. 4. The Legislature finds and declares that a special law is necessary and that a general law cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution because of unique circumstances concerning the South Coast Air Quality Management District.

SEC. 5. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because a local agency or school district has the authority to levy service charges, fees, or assessments sufficient to pay for the program or level of service mandated by this act, within the meaning of Section 17556 of the Government Code.

SEC. 6. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

33 Due to the court decision in Natural Resources Defense Council 34 v. South Coast Air Quality Management District (Super. Ct. Los 35 Angeles County, 2007, No. BS 110792), the South Coast Air Quality 36 37 Management District is unable to issue over a thousand pending permits that are either exempt from offset requirements or qualified 38 to use offset credits from the district's Priority Reserve and is 39 required to set aside thousands of permits already issued; therefore 40

SB 696 —8—

1 it is necessary for this measure to take effect immediately to allow 2 the district to issue permits in an expeditious manner and to 3 validate previously issued permits called into question by the 4 superior court's decision.

SECTION 1. The legislature finds and declares all of the following:

- (a) Under existing law, new or modified sources of air pollutants within a federally designated nonattainment area that result in emission increases over specified thresholds are required to provide emission reduction credits from other sources so that, in aggregate, there is no net increase in emissions.
- (b) The air basins regulated by the South Coast Air Quality Management District are designated nonattainment areas for PM2.5, PM10, and ozone, the majority of which is due to mobile sources.
- (e) Due to strict emission limits on stationary sources and the inability to create material amounts of new emission reduction credits without shutting down businesses and losing jobs, there is a severe shortage of emission reduction credits for sources of PM2.5 and PM10 in the air basins regulated by the South Coast Air Quality Management District.
- (d) In the South Coast Air Quality Management District, certain emission sources, including essential public services, rely on emission credits contained in the district's internal accounts. The district obtains credits for its internal bank from surplus emission reductions not otherwise used for credits. Emission reduction credits have to be real, surplus, enforceable, quantifiable, and permanent.
- (e) The South Coast Air Quality Management District recently amended Rule 1309.1 to make emission credits from its internal bank available to new clean, efficient power plants. The South Coast Air Quality Management District also enacted a new rule governing the accounting and tracking of offsets.
- (f) A recent court decision invalidated the South Coast Air Quality Management District rule specifying how the district accounts for and calculates the amount of emission reduction eredits available. As a result of that court decision permits that rely on credits from the district internal bank cannot be issued.
- (g) The South Coast Air Quality Management District regulates
   more than 28,000 stationary sources, and administers more than

80,000 permits. The Legislature needs act to avoid business shutdowns and job losses, and to ensure electric system reliability.

SEC. 2. It is the intent of the Legislature to enact legislation to ensure that there are sufficient real, surplus, enforceable, quantifiable, and permanent emission reduction eredits available so that essential public services, and new clean efficient power plants needed to maintain system reliability and integrate renewable resources can be permitted by the South Coast Air Quality Management District.

## City of Long Beach Memorandum Working Together to Serve

## REQUEST TO ADD AGENDA ITEM

Date:

April 30, 2009

To:

Larry Herrera, City Clerk

From:

Councilmember Tonia Reyes Uranga

an

Subject:

Support for SB 696 (Wright) – Emission Reduction Credits

Pursuant to Municipal Code Section 2.03.070 [B], the City Councilmembers signing below request that the attached agenda item (due in the City Clerk Department by Friday, 12:00 Noon) be placed on the City Council agenda under New Business via the supplemental agenda.

The agenda title/recommendation for this item reads as follows:

Request the City Attorney to draft a resolution in support of SB 696 (Wright) – Emission Reduction Credits and direct the City Manager to communicate the City's support to Long Beach legislative offices.

Council District	Authorizing Councilmember	Signed by
2	Suja Lowenthal	See Attached Council Letter

## CITY OF LONG BEACH NB-33

DEPARTMENT OF HEALTH AND HUMAN SERVICES

2525 GRAND AVENUE • LONG BEACH, CALIFORNIA 90815 • (562) 570-4000 • FAX: (562) 570-4049

May 5, 2009

HONORABLE MAYOR AND CITY COUNCIL City of Long Beach California

#### RECOMMENDATION:

Recommendation to adopt the attached Resolution proclaiming a local emergency under California Government Code Section 8630 and authorizing the City Manager to execute any necessary agreements with the State of California for Swine Influenza A (swH1N1) control, and ratifying the declaration of a local health emergency issued by the City Health Officer under California Health and Safety Code Section 101080. (Citywide)

#### DISCUSSION

On April 29, 2009, Helene Calvet, M.D., in her capacity as City Health Officer for the City of Long Beach, declared a local health emergency as a consequence of confirmed cases of Swine Influenza A (swH1N1) in Mexico, California, and multiple areas of the United States (Attached). Dr. Calvet issued this declaration pursuant to the authority vested in her under California Health and Safety Code Section 101080, after consultation with public health officials and upon determining that a health emergency exists in Long Beach involving Swine Influenza A that affects, or has significant potential to negatively affect, the public's health.

Under State law, however, this declaration must be ratified by the City Council within seven (7) days. The attached Resolution ratifies the City Health Officer's declaration of local health emergency issued on April 29, 2009. In addition, the Resolution proclaims the existence of a local emergency under California Government Code Section 8630 and authorizes the City Manager to execute any necessary agreements with the State of California for Swine Influenza A (swH1N1) control. The City Council must review the continuing need for the emergency at least every fourteen (14) days and proclaim the termination of the emergency at the earliest date that conditions warrant. Since this strain of flu is new and there is no preventive based vaccine yet developed to prevent the spread in the community, a continuing state of emergency is necessary in order for the City Health Officer to take emergency measures to control the spread of this flu, such as requesting medical supplies from the Federal Strategic National Stockpile.

This matter was reviewed by Deputy City Attorney Linda Trang on April 30, 2009 and by Budget and Performance Management Bureau Manager David Wodynski on April 30, 2009.

HONORABLE MAYOR AND CITY COUNCIL May 5, 2009 Page 2

#### **TIMING CONSIDERATIONS**

City Council action is requested on May 5, 2009 to adopt the Resolution declaring a local emergency, and ratifying the City Health Officer's declaration of local health emergency concerning Swine Influenza A control.

#### FISCAL IMPACT

There will be no fiscal impact associated with the requested action.

#### SUGGESTED ACTION:

Approve recommendation.

Respectfully submitted,

Ronald R. Q.

RONALD R. ARIAS

**DIRECTOR** 

**HEALTH AND HUMAN SERVICES** 

APPROVED:

PATRICK H. WEST CITY MANAGER

#### RESOLUTION NO.

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF LONG BEACH PROCLAIMING THE EXISTENCE OF A LOCAL EMERGENCY DUE TO SWINE INFLUENZA A (SWH1N1) CASES, AND RATIFYING THE DECLARATION BY THE CITY HEALTH OFFICER OF A LOCAL HEALTH EMERGENCY

WHEREAS, Section 8630 of the California Government Code empowers the City Council to proclaim the existence of a local emergency to protect and preserve public welfare when the City is affected or likely to be affected by a public calamity; and

WHEREAS, the City Council finds that the current confirmed cases of Swine Influenza A (swH1N1) in Mexico, California and multiple areas of the United States, have prompted the federal government to determine that a public health emergency exists nationwide which affects or has the significant potential to affect national security; and

WHEREAS, the City Council finds that the increase of reported cases has also prompted the Governor of the State of California to proclaim a state of emergency, and the Los Angeles County Board of Supervisors to proclaim a local emergency; and

WHEREAS, as a consequence of this condition and a "probable positive" test for Swine Influenza A on a resident in the City, the City Health Officer of the City of Long Beach did declare a local health emergency within the City on April 29, 2009; and

WHEREAS, the City Council finds that that newly identified Swine Influenza A virus is an infectious and communicable disease, which creates a condition of extreme peril to the health and safety of persons within the City, and which is likely to be beyond the ability and resources of the City to control; and

WHEREAS, a declaration of a local emergency will assist in a coordinated

public health response to reduce transmission and illness severity, provide assistance to health care providers, and mitigate the effects of this potential pandemic on the citizens of the City; and

WHEREAS, the conditions and circumstances described above warrant and necessitate that the City proclaim the existence of a local emergency; and

WHEREAS, the City Council desires to declare a local emergency and to ratify the declaration of a local health emergency by the City Health Officer, and to authorize the City Manager to enter into any necessary agreements with the State of California to obtain any emergency assistance to implement necessary intervention activities to prevent a threatened epidemic of disease in the community;

NOW, THEREFORE, the City Council of the City of Long Beach resolves as follows:

Section 1. Pursuant to Section 8630 of the California Government Code, the City Council hereby finds and proclaims the existence of a local emergency caused by conditions or threatened conditions of Swine Influenza A (swH1N1) in Long Beach which, if not corrected, constitutes a threatened epidemic with its resultant morbidity and mortality to the extreme peril of health and safety of persons within the territorial limits of the City.

Pursuant to Section 101080 of the California Health and Section 2. Safety Code, the City Council hereby ratifies the declaration by the City Health Officer of a local health emergency in the City of Long Beach resulting from the presence or potential presence of individuals susceptible to Swine Influenza A (swH1N1) which, if intervention measures are not instituted, pose a threat of an epidemic of said disease in the community. The City Health Officer is authorized to take the necessary intervention measures to protect and preserve the public health from said public health hazard.

Section 3. The City Manager is hereby authorized to furnish information, to enter into agreements and to take all actions necessary to obtain State emergency assistance to implement preventive measures to protect and preserve the public health of

the City from said public health hazard within the scope of the local emergency hereby declared.

Section 4. The City Clerk shall certify to the passage of this resolution by the City Council of the City of Long Beach and it shall thereupon take effect. In accordance with the provisions of Section 8630 of the California Government Code and Section 101080 of the California Health and Safety Code, the City Clerk shall include the matter of the necessity for continuing the local emergency and the local health emergency on the City Council agenda for review at least every fourteen (14) days until the City Council terminates said local emergency and local health emergency.

Section 5. This resolution shall take effect immediately upon its adoption by the City Council, and the City Clerk shall certify the vote adopting this resolution.

I hereby certify that the foregoing resolution was adopted by the City

Council of the City of Long Beach at its meeting of \_\_\_\_\_\_, 20\_\_\_\_ by the following vote:

## CITY OF LONG BEACH

DEPARTMENT OF HEALTH AND HUMAN SERVICES 2525 Grand Avenue, Long Beach, California 90815 (562) 570-4047 FAX (562) 570-4049

# DECLARATION OF LOCAL HEALTH EMERGENCY BY THE CITY HEALTH OFFICER FOR THE CITY OF LONG BEACH

WHEREAS, cases of Swine Influenza A (swH1N1) in Mexico, California, and multiple areas of the United States have been confirmed; and

WHEREAS, as a consequence of the reported outbreak of numerous cases of non-seasonal influenza, the United States Department of Health and Human Services has declared a public health emergency, the Governor of the State of California has proclaimed a state of emergency, and the Los Angeles County Board of Supervisors has proclaimed a local emergency; and

**WHEREAS**, the Department of Health and Human Services of the City of Long Beach has consulted with public health officials as necessary, and finds there is an imminent and proximate threat of the introduction of contagious, infectious and communicable disease into Long Beach;

NOW, THEREFORE, I, Helene Calvet, M.D., City Health Officer for the City of Long Beach, Department of Health and Human Services, pursuant to the authority vested in me by the Local Pandemic and Emergency Health Preparedness Act of 2006, and in particular California Health and Safety Code section 101080, determine that a health emergency exists in Long Beach involving Swine Influenza A that affects or has significant potential to negatively affect the public's health and HEREBY DECLARE A LOCAL HEALTH EMERGENCY in the City of Long Beach.

This Declaration shall take effect immediately and remain in effect for a period of seven (7) days from the date hereof, until ratified by the City Council of the City of Long Beach, or unless sooner terminated.

Signed,

Dated:

April 29, 2009

Helene Calvet, M.D. City Health Officer

## City of Long Beach Memorandum Working Together to Serve

## REQUEST TO ADD AGENDA ITEM

Date:

April 29, 2009

To:

Larry Herrera, City Clerk

From:

Subject:

Request to Add Agenda Item to Council Agenda of May 5, 2009

Pursuant to Municipal Code Section 2.03.070 [B], the City Councilmembers signing below request that the attached agenda item (due in the City Clerk Department by Friday, 12:00 Noon) be placed on the City Council agenda under New Business via the supplemental agenda.

The agenda title/recommendation for this item reads as follows:

Recommendation to adopt the attached Resolution proclaiming a local emergency under California Government Code Section 8630 and authorizing the City Manager to execute any necessary agreements with the State of California for Swine Influenza A (swH1N1) control, and ratifying the declaration of a local health emergency issued by the City Health Officer under California Health and Safety Code Section 101080.
